(54) MULTILAYER-COATED POWDER AND METHOD FOR PRODUCING THE SAME

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a multilayer-coated powder that is colored in a desired tint and provide a method for producing the multilayer-coated powder.

SOLUTION: The multilayer-coated powder comprises a base particle having thereon a multilayered coating film, which is colored by the light interference action of the multilayered coating film wherein at least one layer of the multilayered coating film is constituted of a translucent film. The method for producing the multilayer-coated powder comprises forming a multilayered coating film on the surface of a base particle and coloring a multilayer-coated powder by the light interference action of the multilayered coating film wherein at least one layer of the multilayered coating film is constituted of a translucent film.
